355 Troop Carrier Squadron - History

Trained as a reserve squadron as part of the 302nd Troop Carrier Wing from Jun 1952. Began flying airlift operations in the United States and overseas in the mid-1950s. On active duty during Cuban missile crisis of 1962. From Apr 1968 to Mar 1973, provided C-119 gunship training for pilots, navigators, flight engineers, and mechanics of USAF active units and similar personnel from Jordan, Morocco, Ethiopia, and South Vietnam. By the mid-1960s, wing aircraft and crews performed worldwide airlift missions and participated in numerous tactical exercises.

In Apr 1973, the wing assumed a rotational airlift task in support of USAF Southern Command, continuing this mission through Jan 1976. Also in Apr 1973, the wing assumed a UC-123 aerial spraying mission, which frequently took wing crews to Central America, the Caribbean, the Azores, North Africa, islands of the Pacific, and to many U.S. points for insect-spraying missions. Inactivated in 1982. Reactivated in 1985 as a C-130 unit at Peterson AFB, Colorado.

The 356 descended from WWII organizations and was part of the 302^d Troop Carrier Group Medium. The initial 356 Troop Carrier Squadron started on 14 June, 1952 at Clinton County AFB. The 356 Tactical Airlift squadron relocated to Lockbourne AFB in 1971, then the Wright Patterson AFB in 1993.

356 Troop Carrier Squadron - History

356th TAS History

The 356th Tactical Airlift Squadron patch features the winged horse, "Pegasus". It was the logo of the Fairchild Aircraft Company, the builder of the C-119. The latin phrase, "VICTOR VIAM DUCAT", (Let a Winner Lead the Way) was added to give the patch a touch of class.

This information was provided by Ken Race, the d6signer of the 356th Squadron Patch.
